1   Text Formatting

This will produce *italiczed* text.

This will produce **Bold Faced** text. This will produce Small Caps font. This will produce `Type Writer Font` .

Please visit `http://google.com` for any doubts.

This text will be large.

<div align="center">This text will be centered.</div>

This text will be left justified.

<div align="right">This text will be right justified.</div>

1.1   Explanation

Use textxx for text formatting. Use begin{} for changing font size.

large < Large < huge < Huge.

small > tiny.

Use begin{} for justification. Flush left can be used to remove the indentation. Same goes with flush right.

Title comes with four lines, and fourth line is compulsory- maketitle. Sections and subsections makes it easy for table of contents.
